

# PADDOCK SLABS

SOLVING MUDDY PADDOCKS

One of the biggest problems most horse owners face during the rainy season is dealing with muddy paddocks. Not only does walking become a difficulty for horses, but there are a host of problems which can ensue.

- Softening of hooves
- Abscesses
- White Line Disease
- Loss of Shoes
- Thrush

Dr. Kirsten Anderson from Alma, Ontario, decided that **hanit® Paddock Slabs** would be the perfect solution for her. Initially, she purchased the Paddock Slabs to minimize the amount of mud being trekked into the house by her dog.

“Once I saw how installing the **hanit® Paddock Slabs** reduced the mud in my house, I knew it would be perfect for outdoors. I am so happy with my decision.”

**Dr. Kirsten Anderson**  
Alma, Ontario

She used the remainder to place under and around her horse feeder, she knew almost immediately that **hanit® Paddock Slabs** were the perfect solution for that application as well.

Dr. Brenda Stewart, who lives near Durham, Ontario, echoed Dr. Anderson's sentiments: **"I am extremely satisfied with the hanit® Paddock Slabs! I would definitely recommend them to anyone who wishes to upgrade a paddock, even in a partial area.**

**"During the muddy season in the fall, the rest of the paddock was in mud three to four inches deep, and the horses' feet were high and dry on the slabs. They preferentially walked and stayed on the slabs when travelling around the paddock, as well! They obviously preferred the footing there. Water did not pool on the area, drained well away, and the footing was excellent when the area froze. An added benefit is that the horse droppings are extremely easy to pick up from the flat, dry surface, enabling it to be picked clean easily every day. An excellent product!"**

### WHY CHOOSE hanit® Paddock Slabs?

- » Prevents sinking
- » Frost and UV resistant
- » Low maintenance
- » Cost effective
- » Recyclable
- » 20-year warranty

## THE HAHN STORY

HAHN began in 1993 when the German government made the move toward **zero waste to landfill**. The company began by making **agricultural fence posts**. It was a tough beginning but now over **15 million** of these fence posts have been sold. **2,000 products** are now manufactured. In addition to this, 25% of the products manufactured are **bespoke products** specifically designed for individual customers.

In 2012 HAHN successfully opened a sales and manufacturing facility in **Manchester**, UK. Expansion continued in 2014 with a sales office in **France**. In 2016 HAHN made the leap across the pond to **Canada** and started manufacturing in 2017. With product installations across the globe, the HAHN Group has grown from a manufacturer of a single product to a **globally recognized company**.
